Rolled Rose Flower from Stencil Elements

A PROJECT FROM OUR LIVE SHOW - BRAND SHOWCASE IN THE HTCN STUDIOS - 25 FEBRUARY 2022

ABOUT THIS PROJECT

Build a dimensional rose by folding and wrapping propeller elements from the stencil around each other, starting with a tight bud in the centre and gradually opening the petals outward. This creates a realistic, layered rose focal point.

TIPS FROM THE SHOW

- Twist the petals in opposite directions as you build outward to create a realistic, opening rose effect.
- You can create roses in multiple sizes using different propeller elements from the same stencil.
- Small roses made by snipping and folding work beautifully as steppers or accent flowers on cards.
