Cut the skyline die from black card stock using your die-cutting machine.

Using a craft tool or brush, gently tap out the small window details from the die-cut silhouette piece. Work carefully to remove all the intricate cut-out sections whilst keeping the main die-cut intact.

STEP 3

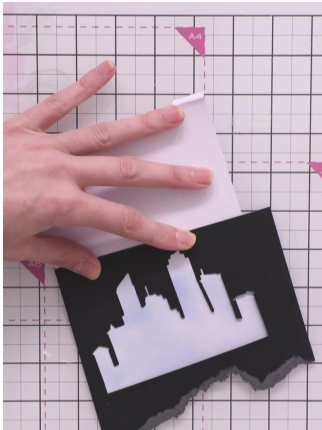

Use the waste (negative space) from the die-cut as a stencil by placing it on white card stock. Secure it in position with low-tack tape to prevent it from moving whilst you work.

STEP 4

Using a blending brush, blend ink through the stencil to create a coloured background behind the skyline silhouette. Work the ink gently through the stencil openings to build up the colour gradually.

STEP 7

Layer the black cityscape silhouette pieces at different heights on your card to create depth and dimension. Position the buildings at varying levels, with some higher and some lower, to achieve a realistic skyline effect.
