

3D Embossed Design Card

21 MAY 2025

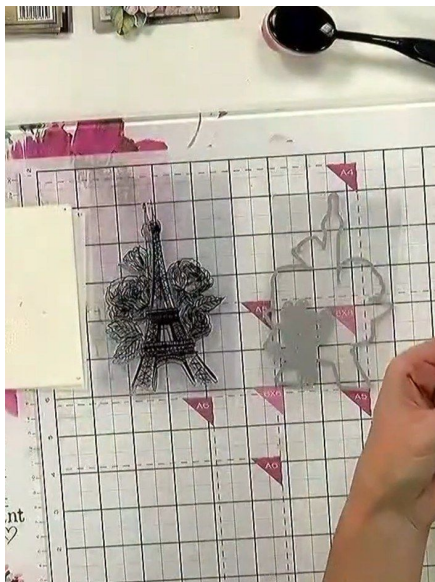

Create a beautiful greeting card featuring a 3D embossed floral design with elegant pink hibiscus flowers and inspirational text. Using an embossing folder and decorative papers, you'll add raised texture and dimension to create a luxury, handmade card. The technique combines embossing with layered elements to produce a stunning, professional-looking result.

WHAT YOU WILL NEED

See the show for everything used.

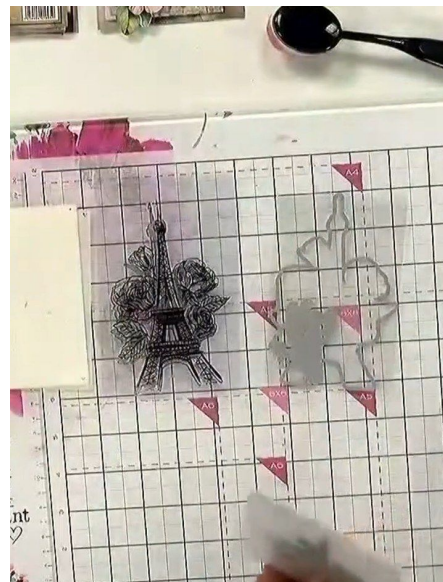

STEP 1

Place your die-cut design piece or prepared card stock on the magnetic glass mat. Position a pink card blank on the mat to prepare for the embossing process.

STEP 2

Open the 3D embossing folder and position your card stock on the raised side of the folder. Place the card stock carefully to ensure it sits flat within the folder.

Watch this step: 39:00 into the show

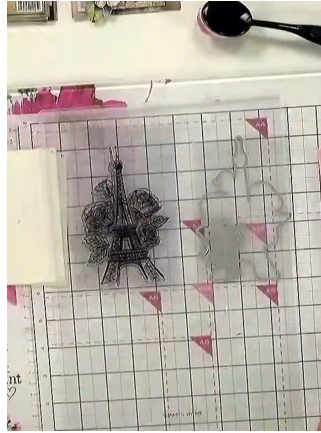

STEP 3

Close the pink embossing folder carefully over your stamped design, ensuring the image is centred within the folder. Press down gently to align the design before running it through your die-cutting machine.

Watch this step: 39:15 into the show

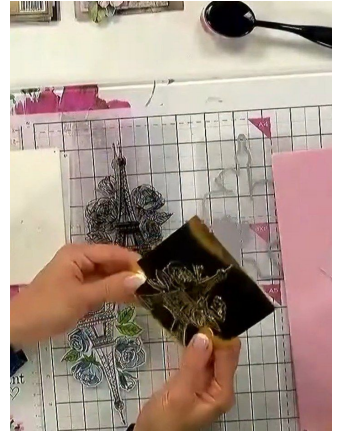

STEP 4

Create a sandwich by placing a clear plate on the bottom of the magnetic glass mat, then position your closed embossing folder on top, and finally place another clear plate on top of the folder.

Watch this step: 39:30 into the show

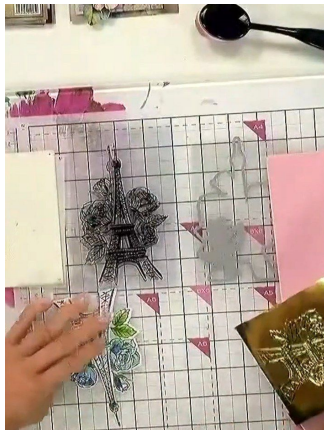

STEP 5

Run the sandwich through your die-cutting machine using the hand crank to emboss the design onto your card.

Watch this step: 39:45 into the show

STEP 6

Carefully remove the embossing folder from your card. Admire the raised and recessed 3D effect created on the pink card panel, showing the detailed hibiscus design.

Watch this step: 40:00 into the show

TIPS FROM THE SHOW

- The embossed effect is raised on one side and debossed (recessed) on the other.
- You can use white ink on dark card stock to highlight the embossed details.
- Don't worry about perfect alignment – the embossing will still look beautiful.
